SECTION 3: .............................................................................................................. 49

STATEMENT OF LONG-TERM GOALS: IDEAL VISION................................. 49
SECTION 1: INTRODUCTION
INTRODUCTION

Over the past five years Maharishi University of Management has seen significant growth of enrollment and increasing recognition as the premier model of Consciousness-Based Education throughout the world. There is a growing consensus that the desire and need for Consciousness-based education is increasing on a global scale, and the University will continue to be in a period marked by significant growth and expansion over the next 5-10 years.

From 2009 - 2012 the University developed a strategic plan with input from all University constituents including; students, faculty, administrators, trustees, and donors. Utilizing this broad spectrum of input, we developed a plan which articulates the future vision of Maharishi University of Management and charts the steps to achieve that vision. In the Spring of 2011 we printed the first public copy of our five-year strategic plan. Many further developments have happened in these past 24 months and after re-engaging many of the same constituent groups in further discussion we are excited to present a new revised plan that reflects the past two year’s achievements and the latest in our re-prioritization of expansion initiatives.

Over the past several years, the University has been successful in broadening its market appeal, transitioning from incoming classes largely composed of students who were long-term practitioners of the Transcendental Meditation program, to attracting those from the general population of non-meditating college bound students who appreciate the unique appeal of Consciousness-Based Education.

To sustain a high degree of retention of this new generation of students, significant investment has been made to improve delivery of Consciousness-Based Education by our faculty, and in the out-of-classroom experience guided by the Student Life department, where we hired a new Dean and strengthened the whole department.

There have also been significant changes in the recruiting process by Admissions. This includes having prospective students learn TM before they come to MUM, which in the Fall 2012 intake, resulted in more than 100 students learning the TM program in the field before coming to MUM.

On-line education continues to grow in the US with new offerings that potentially are reshaping the field of higher education forever. MUM’s start-up efforts in this area are timely and still expected to develop into a large department with national and international reach.

Limitations in Federal financial aid are requiring our students to pay more out-of-pocket than at anytime in the past five years. That trend is expected to continue. This is a challenge requiring new marketing initiatives to reach students who do not require as
much scholarship support, and new academic programs which enable students to secure more outside funding, such as new MA programs in Maharishi’s Vedic Science, Media and Communications, and Sustainable Living.

Over $18 million in new construction and $8 million in renovations have been invested over the past 12 years to upgrade and expand our facilities to accommodate growth and new program requirements to achieve our strategic goal of creating a campus in tune with Natural law through Maharishi Vedic Architecture.

Research in consciousness, the most important foundation for our whole University and extended community has seen remarkable growth through the personal experiences of those participating in the Invincible America Course and in the MA and Ph.D programs of Maharishi’s Vedic Science.
FOUNDING GOALS

Maharishi University of Management was founded in 1971 by His Holiness Maharishi Mahesh Yogi. The goals were developed in light of the fundamental role that education plays in helping society achieve its highest aspirations:

1. To develop the full potential of the individual
2. To realize the highest ideal of education
3. To improve governmental achievements
4. To solve the age-old problem of crime and all behavior that brings unhappiness to our world family
5. To bring fulfillment to the economic aspirations of individuals and society
6. To maximize the intelligent use of the environment
7. To achieve the spiritual goals of humanity in this generation

Please see Appendix: Statement of Long Term Goals – The Grand Vision

EXcerPTS FROM MUM’S MISSION STATEMENT

Maharishi University of Management was founded to fulfill the highest ideals of education. Foremost among these ideals is developing the inner potential of every student. We offer Consciousness-Based education, which integrates traditional academic disciplines with the study of consciousness, and the practice of Transcendental Meditation and the TM-Sidhi programs. This integrated approach develops graduates who achieve personal fulfillment and professional success, and become leaders in creating a better world.
CORE VALUES

These shared values characterize our campus culture and guide University decision-making:

1. Development of consciousness — We are committed to developing our full potential — intellectual, emotional, physical, and spiritual — through the Transcendental Meditation and TM-Sidhi programs, including Yogic Flying. Development of consciousness is the foundation of Consciousness-Based education and of success in all aspects of life.

2. Academic excellence — We promote engaged learning and intellectual inquiry and growth, within a framework that connects the parts of knowledge to the wholeness of knowledge and the wholeness of knowledge to the Self — so that students never feel lost.

3. Health and happiness — We value a campus culture that promotes health and well-being, safety, enjoyment, positivity, and a spirit of fun.

4. Sustainability — We are committed to creating a campus in harmony with natural law and a new model of sustainability that includes inner as well as outer sustainability.

5. Unity within diversity — We celebrate a rich diversity of cultures, backgrounds, and values in our students, faculty, and staff, unified by the shared experience of the field of pure consciousness underlying all of life.

6. Community — We value kindness, respect, honesty, friendliness, and mutual support — byproducts of growth of consciousness.

7. Excellence — We are committed to achieving excellence in all aspects of University life through continuous improvement.

8. World peace — We are dedicated to creating national invincibility and world peace through the group practice of the Transcendental Meditation and TM-Sidhi programs, including Yogic Flying.
SECTION 2: STRATEGIC PLAN
Five-Year Vision and Goals

Maharishi University of Management is a vibrant, growing community, where students, faculty, and staff develop their inner potential through Maharishi’s technologies of consciousness, including the Transcendental Meditation technique and TM-Sidhi Program. Our highest aspiration is to support a group of at least 2,000 Yogic Flyers, large enough to create invincibility for North America. Enrollment in our Fairfield campus will exceed 1,000 students, creating a vibrant, diverse community and serving as a model for higher education, offering Consciousness-Based education along with rigorous and innovative academics to raise the achievement of any student to their highest levels. Graduates have a deep confidence in themselves and live healthy, balanced lives, excel in their careers, accomplish their personal goals, and are committed to helping create a better world.

### Student Learning – Goals for Years 1 – 5

**GENERAL EDUCATION MEASURES**

- Document high levels of student engagement using the National Survey of Student Engagement, to be administered every two years.
- Document critical thinking, reading, writing, math, and information literacy using the ETS Proficiency Profile, particularly in light of new academic initiatives.
- Monitor student learning through analysis of the Senior Project program, beginning in 2012–2013.

**INDIVIDUAL PROGRAM MEASURES**

- Each academic program utilizes reliable measures of student learning specific to the discipline – administered and monitored annually.

**PLANNING, BUDGETING, AND ASSESSMENT**

- Integrate assessment of student learning closely with strategic planning and budgeting.
- Increased faculty compensation initiative.

**RECRUITING AND TRAINING**

- Recruiting and training of new faculty to deliver consciousness-based education to accommodate enrollment growth.

### Growth of Consciousness – Year Five Goals

- 30% of students participate in the Brain Integration Progress Report (as freshmen and again as seniors), demonstrating longitudinal growth in brain integration.
- Document improvements in student scores on the Development of Consciousness Questionnaire and the Happiness Scale.
- Inspire faculty and staff for group program attendance – to reach 75%.
- Inspire students to learn the TM-Sidhi Program – participation reaching 60%.
- Inspire number of students going to the TM Teacher Training Course – 25 per year.
- Public Service – increase the contribution to Vedic Scholars support in India (see financial model).

STRATEGIC INITIATIVES

The strategic initiatives listed below have several defining characteristics:

• They are financed through annual budget expenditures that are new, meaning significantly higher than the previous year.
• They typically represent significant programs of coherent activity that are meant to drive the “dials on the dashboard” by which we measure our progress toward strategic goals.
• They have a minimum planned lifetime prior to which we would not substantially alter their funding.
• Each of these initiatives is meant to drive one or more of the four Strategic Priorities: Student Learning, Increased Enrollment, Financial Stability, and Growth of Consciousness.

Increased Student Recruiting Initiative For Standard Program Students

1. Goals this initiative contributes to:
   a. Increased Enrollment
2. Explanation of initiative:
   The current marketing and recruiting efforts for standard program students are upwardly scaleable and the University is committing to additional investment in this area to meet the five-year enrolment goals. The financial model for growth assumes $2,200 extra expense for additional marketing and personnel each year in advance of the intended growth. The following table highlights the key metrics and corresponding budget investment to achieve the growth targets, including increases in the number of full time Admissions’ Councilors.
Specific initiatives being launched by the Admissions team to grow enrollment include:

- **Content management system** — Deployment of new Content Management System. The University website continues to be most influential component in our recruiting efforts.

- **Two-year college feeder schools** – Creating “feeder schools” with hundreds of students practicing the Transcendental Meditation program at two-year colleges, which we have begun with Joliet Junior College in Illinois.

- **New approach to handling inquiries** — Converting a higher percentage of inquiries to applicants through our new approach to dealing with inquiries. The new approach involves (a) feeding all inquiries to a single person (Peter Orange) rather than spreading them among all the Admissions Counselors, and (b) equipping him with a system that automatically dials the numbers of all the inquiries, then stops dialing as soon as it gets an answer — and displays that person’s information on Peter’s computer screen. Peter has now spoken to over 80% of the inquiries that have come in during the month since he started, compared to the 30% our ACs have reached over the past two years.

- **Referrals from Transcendental Meditation Centers** — Working with Raja Hagelin, we are working to increase the number of referrals from the Transcendental Meditation Centers, reflecting the increased number of new Transcendental Meditation instructions in America.

- **Full-time writer** — We have hired a full-time professional writer, Warren Golde. Among other projects, he will highlight the success of our alumni, helping reinforce the practical
benefit of an MUM education.

- **Public relations** — We are working on a good candidate to be a professional Public Relations Director to head a much-needed MUM public relations effort on the national level. Our prospect is currently in charge of public relations for the US government for all of Latin America.

- **New master’s degrees in planning** — In Media and Communications, Sustainable Living, and Integrative Medicine (with two tracks: Health Professionals and Wellness Consultants). Also in the works: the MA in Maharishi Vedic Science will be available through distance education starting in February. The Business Department faculty are starting to put MBA online. And a DE Master’s in Computer Science will soon be ready to launch.

- **Funded scholarships** — Having the flexibility to give funded scholarships to leverage students’ ability to pay for their education at MUM would allow more students to enroll while maintaining our revenue margins. Example: This fall 6 applicants to the MA program in Maharishi Vedic Science fell short by just $4,000 each because of limited ability to obtain a second loan.

3. Who is responsible:
   a. EC Member – Dean of Admissions
   b. Department – Admissions

4. Metrics to measure success:
   a. New Student Enrollment – Standard Programs

5. Resources needed to implement:
   a. As outlined above and in the financial model

6. Timeline:
   a. As outlined above and in the financial model

### Increased Student Recruiting Initiative For COOP Students

1. Goals this initiative contributes to:
   a. Increased Enrollment COOP Students

2. Explanation of initiative:

   **MS in Computer Science Recruiting Focus**

   **US Market:**

   Created and mail MSCS program poster/brochures to top US CS Departments & selected university international student advising offices.

   **International Market:**

   **Jobsites:**
• Post "Job-listings" on numerous African, Middle Eastern, Eastern European jobsites--both free and paid.

• Send targeted emails to jobsite email lists

**Web:**

• Run pay-per-click ad campaigns on Google & Facebook.

• Frequent posting & communicating with prospective/current/former students on Facebook (1700 members), LinkedIn (600 members) & Twitter (250 followers), Google Blogs.

• Create added value to our software engineer social media subscribers, by publicizing positive industry trends and internshiphirings of our students in social media

**GRE:** Send repetitive emails to targeted internationals taking GRE each month.

**MSCS Website:** Frequent updating of ComPro website, including departmental events calendar.

Publication & dissemination of ComPro monthly e-newsletter (31,000 current subscribers).

**Personal Approach for friend referrals:**

• Combining Hi-tech and Hi-touch approach to family of ComPro students. Includes frequent personal interactions, and open-door policy. Take and make student photos available to on-campus students.

• Survey each new entry to get latest feedback on our website, academic program, campus life, and suggestions for reaching more students from their countries.

• Manage ComPro student referral program, allowing current and former students to receive commissions for successful new student referrals.

• Have evening “tea” parties for small groups at Craig Shaw’s apartment to help them feel more at home and appreciated.

• Send birthday wish to every current MSCS student and alumni.

**Statistics:**

• Regularly generate and analyze application and enrollment reports for fine-tuning approaches & expenditures.

**Agents:**

• Manage MUM’s Student Referral Agent Program, sending international agents electronic recruiting materials, commissions and support.

• Try to inspire Raja’s and National Leaders to recruit MSCS students to
get our referral fee.

**Application process:**

- Working closely with Admissions staff to provide rapid responses to incoming inquiries, and to receive suggestions for fine-tuning recruiting efforts.
- Target particular popular countries and email photos and quotes from MSCS students from those countries.

**Visas:**

- Appointment of a dedicated person as Consular Office Liaison to maintain regular communications with Foreign Service Posts and the International Student Advisor to maintain a flow of current information and materials to new Posts and Consular officers.
- General Counsel is working with the State Department in Washington to address systemic issues which are impacting visa issuance rates, particularly in the key countries of Ethiopia and Nepal.
- Admissions Representatives conduct regularly assessed practice interview with most applicants to help them prepare for their visa interview.

3. **Who is responsible:**
   - a. EC Member – Treasurer and General Council
   - b. Department – COOP Board and COOP Recruiting Office

5. **Resources needed to implement:** Budget as indicated in financial model

6. **Timeline:** As shown above and in financial model

---

**Improve Visa acceptance rates for COOP and standard students**

1. **Goals this initiative contributes to:**
   - a. Increased enrollment
2. **Explanation of initiative (same as included in Increased COOP Enrollment section):**
• Appointment of a dedicated person as Consular Office Liaison to maintain regular communications with Foreign Service Posts and the International Student Advisor to maintain a flow of current information and materials to new Posts and Consular officers.

• General Counsel is working with the State Department in Washington to address systemic issues which are impacting visa issuance rates, particularly in the key countries of Ethiopia and Nepal.

• Admissions Representatives conduct regularly assessed practice interview with most applicants to help them prepare for their visa interview.

3. Who is responsible:
   a. EC Member – General Council

4. Metrics to measure success:
   a. Visa acceptance rate increases by 25% from current level

5. Resources needed to implement:
   a. $15,000

6. Timeline:
   a. Completed in year one

**Increased Online Education**

1. Goals this initiative contributes to:
   a. Increased Enrollment
   b. Financial Stability – Net revenues from on-line education

2. Explanation of initiative:

   This initiative has three elements or integrated strategies:

   **Element 1:** increase the number of offerings of credit and non-credit courses

   **Element 2:** increase the number of people who are aware of the online offerings.
   This will be done primarily through the following actions:

   a. Create expansive domestic and overseas campaigns to attract seekers of knowledge to the website

   b. Create “communities” around Maharishi Ayurvedic knowledge as it applies to individual lifestyles

   c. Create cooperative affiliations among various Movement entities (MAPI, The Raj, etc.)

   d. Create cooperative affiliations among groups that have an affinity for Maharishi’s knowledge

   **Element 3:** produce degree programs

   e. Support MUM departments in creating online courses in preparation for
f. Provide guidance and expertise to enable departments to offer a degree program.

3. Who is responsible:
   a. EC Member – Dean of Faculty, Director of Global Expansion
   b. Department – DE / On-line Education Department

4. Metrics to measure success:
   The two measures of success are:
   1. **Number of degree programs and other course offerings**
      By Phase II (see below) the initiative should have produced at least one degree program and be prepared to launch a second program. At least 20 online courses should also be offered during this Phase.
      By Phase III the initiative should produce at least four degree programs and not fewer than 50 online courses. The 50 courses include courses offered as a part of degree programs.
   2. **Revenue**
      a. During Phase I the initiative will be funded by the operating budget. This Phase is a capacity building period so that the department will be able to produce online courses.
      b. During Phase II the initiative will return an increasing surplus to the University while rounding out the capacity building.
      c. During Phase 3 the initiative will return regular and significant surpluses to the University.

5. Resources needed to implement:
   a. Personnel
      Most of the personnel positions have been filled as of October 31, 2012. There are graphic design and instructional design positions not yet filled.
   b. Equipment
      - The department has immediate need of the following:
        - Cameras and other video equipment
        - Computers for processing video files and other graphic files
        - Computers for staff work stations
        - Other office equipment such as printers, etc.
   b. Facilities
      - The department needs permanent studio space

6. Timeline:
   a. Phase I
This is the capacity building Phase that will last for approximate 2 years. Courses and other offerings will be created during this period of development. The department will be generating enough revenues to offset the expenses.

b. Phase II

This Phase will last for 1 to 2 years as the department is fully developed and begins to return a steadily increasing surplus to the University. This Phase is expected to commence during fiscal year 2013.

c. Phase III

This is the fully mature stage when the department will be capable of playing a lead role in fulfilling the online aspirations of the University.

---

**Strategy to Increase Average Student Revenue**

1. **Goals this initiative contributes to:**
   
   Increase average revenue per student for standard program students

2. **Explanation of initiative:**

   **SWOT Analysis:** The chart below illustrates how two types of financial aid our students receive are limited pools that won’t increase with a larger student body. This results in a smaller award and a higher out-of-pocket contribution from each student, just to keep the same level of fees coming to the University. The prediction from the Director of Financial Aid would be that the University would not see any increase in the average fees per student in the standard program category for the five-year horizon unless corrective action is taken.
This chart indicates that the average fees per student for standard programs have remained relatively flat for the past five years.
masters degree programs for several years. As these new programs come online starting Fall 2013, it will increase the ratio of masters degree students as a percentage of the whole and will naturally result in a higher average student fees per student.

Secondly, 70% of the current US student body qualifies for maximum financial aid. This means that their ability to contribute personal funds toward the cost of education is minimal. These students typically receive the highest amount of institutional scholarships, which are currently unfunded. If the University can attract students whose financial aid analysis indicates their ability to contribute a significantly higher amount toward their education than our average, then our average fees per student would increase. Our goal is to decrease the number of students qualifying for maximum financial aid from 70% to 50% and increase the number of “full pay” students, those whose financial resources allow them to contribute close to the full amount of our published tuition/room & board, from 10% to 20%. In addition, the University intends to raise more scholarship funds as indicated in the Endowment Strategic Initiative.

1. Create new Masters in Media & Communications, Sustainable Living and Integrative Medicine.

   Ongoing – See separate initiatives for each of these programs.

2. Invest in campus infrastructure

   Ongoing – See separate initiative for renovations.

3. Increase positive awareness of MUM on the Internet and dispel negative misconceptions.

4. Major PR push to educate general population about the positive attributes of MUM. Hire someone to work on PR and eliminating negativity. Hire a second person to do marketing and work together with PR person, reporting to Admissions marketing department.

5. Increase funded institutional scholarships for students with higher academic performance to improve profile of academic achievement of our student body. Request Trustees to support $50,000/year for extra scholarships in year one, $100k, $150k, and $200k, subsequent years to support on-going scholarships for this initiative.

6. Offer more aid to higher performing students and less aid to lower performing, resulting as further initiative in congruence with #5’s goals above. Balance the distribution so as to result in neutral affect to total student revenues. Will set criteria and appoint a scholarship review board. (Give something extra to those who have done very well. Middle group stays the same. Those not doing well, reduce a little and let them know it can be restored.)

7. Continue to tie the academic experience at MUM with practical employment. New Admissions position created to gather and publicize data and coordinating with Alumni Office.
3. Who is responsible:
   a. EC Member – Dean of Admissions, Chief Administrative Officer, Dean of Faculty
   b. Department – Admissions, Facilities Management, Media and Communications, Sustainable Living, Physiology and Health

4. Metrics to measure success: Percentage of students qualifying for maximum financial aid reduced from 70% to 50%, percentage of students qualifying for no financial aid increases from 10% to 20%

5. Resources needed to implement and Timeline: This table presents cost estimates and timeline for specific action steps to improve the University’s ability to attract students with higher personal contribution margins. The resources needed to start the new MA programs are detailed in the sections specific to those startup programs.

Endowment Campaign

1. Goals this initiative contributes to:
   a. Student Learning, through providing funding for academic department chairs and distinguished faculty
   b. Increase Enrollment, through providing funding for renovations on campus to accommodate a growing student population
   c. Financial Stability, through providing funded student scholarships that can increase our average student revenue
   d. Growth of Consciousness, through scholarships to Sidha students who are in financial need

2. Explanation of initiative:
   The University has had a relatively small endowment for many years. To support the growth of the University, including faculty and staff salaries and other initiatives, the Board of Trustees resolved to launch a $50-million endowment campaign, after which the target would be increased to $100 million or more.
   
   Hired a consulting firm to assist in developing specific strategy and build up organizational infrastructure.
   
   Hired new Annual Fund director full-time to free the previous Annual Fund directors to work 50% on the Endowment Campaign.
   
   Hired two full-time staff in the Alumni Office to enhance alumni engagement in support of the campaign.
   
   Increased the budget for travel and printing.
   
   Reallocated existing staff to support campaign.

3. Who is responsible:
   a. Trustee – Chairman of the Institutional Advancement Committee and Campaign Cabinet
   b. University President
   c. EC Member – Vice President of Expansion
   d. Co-directors for Institutional Advancement
   e. Alumni Office Director

4. Metrics to measure success:
   a. 2012-13: Raise $5 million pledges and net $1 million cash
   b. 2013-14: Raise $10 million pledges and net $1.5 million cash
   c. 2014-15: Raise $10 million pledges and net $5 million cash
   d. 2015-16: Raise $10 million pledges and net $2.5 million cash
   e. 2016-17: Raise $10 million pledges and net $5 million cash
   f. 2017-18: Raise $10 million in pledges and net $5 million in cash

5. Resources needed to implement:

6. Timeline: See financial model

ENDOWMENT CAMPAIGN FUNDING PRIORITIES
$50 million Comprehensive Endowment Campaign

**Expanding Undergraduate Enrollment - $20 million**
Scholarships enable the University to strategically recruit and retain accomplished students who are committed to inner growth and serving humanity.
- Endowed scholarships to attract exemplary U.S. students ($2 million)
- Endowed scholarships to attract exemplary international students ($3 million)
- Need/merit-based endowed scholarships for new and transfer students ($15 million)

**Sustaining Faculty and Staff Excellence - $20 million**
The service of MUM’s professors and administrative staff has long provided a “human endowment” that needs to be supplemented to ensure perpetual academic excellence.
- Endowed chairs and professorships to recognize distinguished faculty ($9.5 million)
- Departmental endowments to enhance budgets and support research ($1.75 million)
- Faculty and staff endowment to establish a sustainable University compensation structure and ensure continued accreditation compliance ($8.75 million)

**Creating a Campus Fully in Harmony with Nature - $5 million**
MUM’s mission calls for a campus with residence halls, classrooms, and cultural venues that are sustainable and carbon neutral and that apply Maharishi Vedic Architecture principles.
- Upgrading of existing academic and residential campus facilities, and improving their energy efficiency ($2 million)
- Renovations to accommodate growing campus enrollment and enhance residential life ($3 million)

**Investing in Future Generations - $5 million**
Maharishi School of the Age of Enlightenment, MUM’s K-12 model school, needs to sustain itself into the future by investing in scholarships, faculty and facilities.
- Need/merit-based endowed scholarships ($3 million)
- Endowed funds for faculty support and professional development ($1.5 million)
- Endowment for capital improvements and equipment replacement ($500,000)

---

**Alumni Office – New and Expanded Strategies**

1. Goals this initiative contributes to:
   a. Student Recruiting through referrals
   b. Financial Stability – Annual Fund and Endowment Campaign
2. Explanation of initiative:
To fulfill its mission of fostering lively engagement between alumni and the university and to inspire alumni to give back through volunteering and donations, the Alumni office employs a variety of strategies.

**Phone Campaign**
Outreach calls to all alumni once every calendar year are intended to deepen the heart value by keeping alumni connected to the university with information about engagement opportunities.

**Class Representative/Chapter Leader Program**
Recruiting alumni volunteers to serve as Class Representatives and/or Chapter Leaders is a vital element of developing a strong alumni network outside of Fairfield. These leaders would help coordinate events in their areas, distribute Class or Chapter news, collect Class Notes, and maintain an accurate contact list.

**Alumni Surveys**
Plan and conduct a major survey every 1-2 years to determine how to best serve Alumni qualitatively and to create a quantitative measure of Alumni engagement and satisfaction.

**Class Notes**
Actively promote submission of Class Notes on the alumni website, social networks, and the University Report and distribute class notes in monthly e-newsletters and bi-annual printed Alumni News.

**Mailings**
Regularly update alumni about our programs and services through attractive mailing campaigns, including an annual letter from the Alumni Association Board and a bi-annual Alumni Newsletter.

**Annual Signature Event**
Once a year, hold a weekend event that brings a larger group of alumni back to MUM and Fairfield. The annual signature event offers a variety of social gatherings and updates about the University from leading faculty and administrators. September (2013): Literature Reunion.

**Alumni Abroad**
Launching in Spring 2013 an Alumni and Friends Reunion Abroad program to be held at least annually at a site of interest and relevance.

**Professional Development**
To learn and implement the latest successful practices in alumni engagement, the alumni office staff will attend industry webinars and conferences and develop networking opportunities with alumni professionals at nearby colleges.

Initiatives to promote student learning, academic excellence, and rigor

1. Goals this initiative contributes to:
   a. Student Learning

2. Explanation of initiative:
   a. Create new Critical and Creative Thinking Seminars, which all new undergraduate students take as their second course at the University, and train all the faculty in how to bring the values of critical and creative thinking into every course they teach.
   b. Elevate the frequency of writing in all courses. Open a Writing Center in the library to offer support to students, and hire a director, Colin Heaton, to train eight students as Writing Center tutors. Bring a nationally-recognized consultant in writing-across-the-curriculum here in February to spend a day further training the faculty.
   c. Make the Senior Projects in each major more robust and rigorous; they will all now conform to a set of University-wide standards.
   d. At the end of October 2012, Dr. Susie Dillbeck will give a second presentation to all the faculty in the classroom methodologies of Consciousness-Based education. This presentation will be on integrating Maharishi Vedic Science with the discipline.

3. Who is responsible:
   a. EC Member – Craig Pearson
   b. Department – Academic Council

4. Metrics to measure success:
   a. Increased scores in ETS proficiency profile

5. Resources needed to implement:
   a. Dr Susie Dillbeck as faculty training speaker,
   b. Colin Heaton as Writing Center Director,
   c. Time from all faculty to improve their teaching methods and Senior Project standards.

6. Timeline:
   a. Results should be seen by the end of the year and the initiative will continue to develop after that.

Office of Outreach and Engagement

1. Goals this initiative contributes to:
   a. Increased Enrollment

2. Explanation of initiative:
   Based on the success of the Experience the Self course this past summer (more than 50 people attended, most of them learned the Transcendental Meditation technique, those already meditating learned an Advanced Technique, participants were inspired in the extreme, young staff and faculty were inspired to help with this, and we made money), we are creating a new Office of Outreach and Engagement, led by Adrienne Schoenfeld,
assisted by Imogen Webber. In addition to planning for next year’s Experience the Self course, the office will run a leadership training program for young staff, faculty, and community members as well as outreach programs to families with talented and gifted children and events for educators and health care providers (there were a number of teachers and health care professionals on last summer’s Experience the Self course).

3. Who is responsible:
   a. EC Member – Craig Pearson
   b. Department – Outreach and Engagement
   c. Person – Adrienne Schoenfeld

4. Metrics to measure success:
   a. People attending Experience the Self course in the summer
   b. People enrolling as students from Self course

5. Resources needed to implement:
   a. Hiring Adrienne Schoenfeld and Imogen Webber

6. Timeline:
   a. Starting 2012/13 and going forward.

Global Development

1. Goals this initiative contributes to:
   a. Increased Enrollment: Total Enrollment

2. Explanation of initiative:

<table>
<thead>
<tr>
<th>Global Development Committee and Office: Responsibilities and 2013 Goals</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Mission:</strong> Global Academic Program Development that enhances education and expands our presence and market globally: and generates International Enrollment Growth at Iowa campus, foreign sites, online, and through blended programs. Review and selection of opportunities.</td>
</tr>
</tbody>
</table>

1) Increased International Enrollment Revenues
   A. Iowa based
      i. Institutional Collaborations.
         2013 Goal: Two new Viable International Collaborations
      ii. Individual recruitment
         2013 Goal: 10% increase in International Enrollments

   B. Global Programs- Development and Supervision
      i. Online and Blended programs, degree and non-degree
         2013 Goal: Two new online degree programs and/or comparable online credit courses deliverable globally
      ii. International Sites and Branches
         2013 Goal: One new international locale for site based DE or international program site
      iii. At Home students:
         2013 Goal: Commence delivery of global online credit programs to
individuals
iv. Affiliate Partner Collaborations.
2013 Goal: Develop the creation of Maharishi Global University with first affiliated higher education partnership, Maharishi Institute of Global Studies in the UK
v. Faculty to Faculty Seminars/Webinars (e.g. MUST)
2013 Goal: Creating a Seminar/Webinar Module for faculty to faculty introduction of MUM to Institutional Collaboration Prospects

2) Experiential Learning
A. Rotating University
   i. Students. 2013 Goal: Two viable student RU’s with 20 participants
   ii. Alumni and Friends. 2013 Goal: One Alumni RU with 15 participants
   iii. Consortium Creation. 2013 Goal: Launching the MUM Study Abroad Consortium with at least two College partners
B. Internships and Consultancies (e.g. Bhutan, Ireland, Nepal).
   2013 Goal: Placing 10 students in international internships and consultancies. Creating a for profit global sustainability consultancy for graduates.

3) Fund Raising for Global Programs and Scholarships
   A. New Donors. 2013 Goal $30,000
   B. Grants (e.g. SAARC) 2013 Goal: $300,000
   C. Benefit Events 2013 Goal: $20,000
   D. Consortium/Alumni: 2013 Goal: $30,000 Surplus
   E. Faculty Seminars/Webinars 2013 Goal: $10,000
   F. Consultancies. 2013 Goal: $20,000
   G. New Initiatives

4) Distance Education - Formative Supervision
   a. Establish Division of Responsibilities vis a vis Continuing Education and For Credit Programs; Academic Departments v. DE Department
   b. Create Office of Instructional Support: To provide faculty training and aid in Instructional Design and offering of online courses and provide assistance for Academic Technologies (LMS)
   c. Regulatory Compliance: Financial Aid, Federal, State Licensure and HLC issues
   d. Administrative Issues: integration of Enrollment and Administration of online programs into infrastructure
   e. Software/Hardware issues: e.g. uniform LMS choice and legacy interfaces

3. Who is responsible:
   a. EC Member – Director of Global Expansion
4. Metrics to measure success:
5. Resources needed to implement:
6. Timeline:
Grants Initiative

1. Goals this initiative contributes to:
   a. Increased Enrollment
2. Explanation of initiative:
3. Who is responsible:
   a. EC Member –
4. Metrics to measure success:

New Business Incubation Center

1. Goals this initiative contributes to:
   a. Increased Enrollment
2. Explanation of initiative:
3. Who is responsible:
   a. EC Member –
4. Metrics to measure success:
5. Resources needed to implement:
6. Timeline:

M.A. in Media and Communications

1. Goals this initiative contributes to:
   a. Student Learning
   b. Increased Enrollment
   c. Financial Stability
   d. Growth of Consciousness
2. Explanation of initiative:
   Starts in Fall 2013, 18 students first year. We expect the new graduate program to allow us to retain one key faculty member who is otherwise at risk of leaving and to recruit up to 30-35 undergraduate and graduate students per year who would not otherwise enroll. The present students in the B.A. in Communications and Media have repeatedly asked the faculty about the possibility of continuing with an M.A. This program has already been approved by the HLC and is ready to launch.
3. Who is responsible:
M.S. in Sustainable Living

1. Goals this initiative contributes to:
   a. Student Learning
   b. Increased Enrollment
   c. Financial Stability
   d. Growth of Consciousness

2. Explanation of initiative:
   Starts in Fall 2013 or 2014, 20 students first year. Overall theme: Sustainable Community Development, to teach students how to actually create a sustainable community, in most cases from an existing community. We have had a continuous stream of requests over the years for a Masters in SL, both from our own students and non-MUM students who already have an undergraduate degree. Much time was spent developing the basic ideas of an MS/MA program about 3 years ago. This program is yet to be approved by the HLC.

3. Who is responsible:
   a. EC Member – Dean of Faculty
   b. Department Chair for Sustainable Living Department

4. Metrics to measure success:
   a. Start of program

5. Resources needed to implement:
   a. Startup: $50,000

6. Timeline:
   a. Proposal to HLC in Spring 2013
   b. First entry Fall 2013, or 2014

M.S. in Integrative Medicine

1. Goals this initiative contributes to:
   a. Student Learning
   b. Increased Enrollment
   c. Financial Stability
   d. Growth of Consciousness

2. Explanation of initiative:
   Starts in Fall 2013, 16 students first year, Startup: $100,000. The M.S. in Physiology will constitute a major expansion of the Maharishi College of Perfect Health. The online format will open this program to potentially hundreds of health care practitioners and
medical students who are eager to be updated in the latest evidence-based integrative health care. This program is yet to be approved by the HLC. With two tracks:

Health Professionals — currently a set of online courses for continuing medical education, by distance education
Wellness Consultants — by distance education — could also be in-residence if we had sufficient faculty.

3. Who is responsible:
4. Metrics to measure success:
5. Resources needed to implement:
6. Timeline:

Other New Degree programs
- DE Master’s in Maharishi Vedic Science — planned to start in February
- DE MBA — courses are being converted to DE this year
- DE Master’s in Computer Science — in planning
Faculty-Staff Compensation Initiative

1. Goals this initiative contributes to:
   a. Improve Student Learning and Increase Enrollment

2. Explanation of initiative:
The purpose of this initiative is to increase faculty and staff salaries across the board, to enable the University to better attract and retain qualified personnel as well as to make compensation more systematic and equitable, eliminating the disparities that have developed in the current structure.

   Progress has already been made on both fronts by a) reinstating pay levels in February, 2011 that were reduced in January, 2009, and b) by giving targeted raises to individuals at the lower end of the pay spectrum who have served at the University full time for at least 5 years.

   Targeted raises will continue in the next fiscal year, as well as taking the first step toward the broader pay equity raises. In the following years only the broader raises will be implemented.

3. Who is responsible:
   a. EC Members – Chief Administrative Officer, Dean of Faculty, Treasurer, Trustees

4. Metrics to measure success: Comparison of compensation to the targets established in the financial model and to similar higher educational institutions. Bring salaries up to the benchmark of 75% of market wages and ideally to market levels thereafter.

5. Resources needed to implement: Financial resources will come from a) specific donations already pledged for the targeted raises, and b) operational revenues as outlined in the 5 year Financial Projections, fourth line from the bottom “Increased Compensation”, which includes income generated from new Endowment funds.

6. Timeline: The next step will be to continue the targeted raises in 2013/2014, as well as begin to implement the broader compensation plan that year. Increments will be made each year as funds are available, with the goal to reach the intermediate target compensation levels in 2017/18 or earlier if possible.

Student Life Initiative

1. Goals this initiative contributes to:
2. Explanation of initiative:
This initiative was designed to improve student experience outside the classroom — to give better services overall along with better support for individual student issues — as the basis of improved student satisfaction and retention.

Key budget increments: Retained a Dean of Student Life, an office assistant, a Resident Advisor Director, a counselor, and the Student Success Center director. The initiative quickly began to produce the desired outcome — higher student engagement leading to increased retention. Policies and procedures have been clarified and systematized and are now more consistently applied. Communication with students has improved. Key initiatives in this area are outlined in this table:

| Work with the faculty to inspire students for higher states of consciousness through Maharishi’s technologies, including |
| Giving students a “Maharishi Vedic Toolbox,” offering various Maharishi technologies to help students take better care of themselves |
| Establishing a student Maharishi Ayurvedic clinic |
| Continue to work with our colleagues to improve student satisfaction, reflected by Student Satisfaction survey and retention rate |
| Promote the concept of a “residential campus,” attracting more students to live on campus by |
| Continuing to improve and maintain physical facilities |
| Planning, with trustee leadership, for new green Maharishi Sthapatya Vedic residence halls with various housing options |
| Improve food service to nourish our students with delicious and nutritious food, prepared and served by a happy, positive food service staff |
| Promote a substance-free campus through |
| Regular practice of the Transcendental Meditation and TM-Sidhi programs |
| Improved orientation and education |
| Support group for students with a history of substance issues, offered in the context of Consciousness-Based education |
| A variety of student activities, especially physical activities |
Continued enforcement of University policies

Improve academic and career advising and support through

Collaboration with and training of academic departments

Creation of student portal (with Enrollment Center and Admissions) allowing for online curricular planning, enrollment, and degree check

Workshops for students on career topics

Creation of a database of internships and employment opportunities

3. Who is responsible:
   a. EC Member – Dean of Students

4. Metrics to measure success:
   a. Retention rates hit targets in financial model

5. Resources needed to implement:
   a. As budgeted in financial model

6. Timeline:
   a. Ongoing

Master Plan

1. Goals this initiative contributes to:
   a. Increased Enrollment (through retention and easier recruiting) and increase average student fees

2. Explanation of initiative:

   To create a master plan for the current campus that will allow for the systematic development of the campus to meet the growing student population. Confluence, a landscape architecture firm with offices in Des Moines and Iowa City, has been engaged to assist with this master planning process. The purpose of the Campus Master Plan is to provide a vision of the campus designed in accord with the principals of Maharishi Vedic Architecture, the Mission documents of the University, and the Five Year Strategic Plan. The result of this Master Planning Process should be a document that provides both a stable and flexible framework for campus development, construction, and renovation over the coming years. It will include circulation plans for vehicles, bicycles, and pedestrians, as well as building zones for various types of campus buildings and designated green spaces and community spaces. Sustainable practices will be a key component of these plans.

3. Who is responsible: Chief Administrative Officer
4. Metrics to measure success: Completed Master Plan

5. Resources needed to implement: Funds are being donated by a Trustee to hire outside consultant.

6. Timeline: The master planning process should be complete by May, 2013.

Campus Renovations

1. Goals this initiative contributes to:
   a. Increased Enrollment (through retention and recruiting) and increase average student fees

2. Explanation of initiative:
   Continue with campus renovations for 2012-13 and beyond. This is planned specifically to improve students’ on-campus living experience and thereby improve student satisfaction and retention, as well as improve “curb appeal” to aid in the recruiting of new students. It will also be necessary to renovate currently empty buildings to house the additional student population anticipated in this plan. Admissions has helped organize and finance curb appeal projects on campus over the past 6 months. Visitors often comment about the visual look of campus — they see great beauty as well as many areas in need of upkeep.

   We will spend about $1.3 million on dormitory improvements in the 2012-13 fiscal year, including new windows, roofs, room improvements, common room improvements, and moisture control. At least another $500,000 is slated for improvements to currently occupied dorms in 2013-14. Also during the 2013-14 year over $300,000 is slated for improvements to the grounds, including roads, sidewalks, and lighting, that will significantly improve the curb appeal of the campus. In addition to these improvements, three residential buildings that are currently unoccupied will be renovated in 2013 and 2014 to accommodate the growing student population.

3. Who is responsible: Chief Administrative Officer

4. Metrics to measure success: Raise percent of undergraduate students living on campus from the current level of about 60% to 75% by 2016-17.

5. Resources needed to implement: Funds for the improvements to currently occupied dorms and grounds have been approved by the Trustees, but final procurement of these funds through loans and donations is yet to be completed. Funding for the renovations of the vacant buildings will need to be approved by the trustees and sources found.

6. Timeline: Most of these renovations should be completed by the beginning of 2015.
New system for academic advising

1. Goals this initiative contributes to:
   a. Increased Enrollment

2. Explanation of initiative:
   Based on student feedback that academic advising could benefit from some improvement, beginning this year all academic advising for undergraduate students is taking place within their major department — their home. Advising for students who have not yet declared a major will be handled by Student Life.

   We have had a training session for the faculty who are taking on the role of academic advising, and this training will continue through the year. The departmental academic advisors and the Student Life advisors for undeclared students have been able to meet with most of the students to choose their classes ahead of time this semester, and we’ve noticed that fewer have come to the Enrollment Center to withdraw from courses.

   In the past there had been a line on the first morning of the block, but now we have noticed that fewer have come to the Enrollment Center to withdraw from courses. This is good news and very lean. There is a more effective level of cooperation among Admissions, Student Life, the Enrollment Center, and the academic advisors.

3. Who is responsible:
   a. EC Member – Craig Pearson
   b. Department -

4. Metrics to measure success:
   a. Fewer students dropping courses and/or switching courses last minute
   b. Contribute to lean initiative through more efficient infrastructure, which also contributes to financial stability.

5. Resources needed to implement:
   a. Faculty trained in academic advising, and willing to take the time to do academic advising

6. Timeline:
   a. Starts this year and goes on perpetually.

Web Content Management System

1. Goals this initiative contributes to:
   a. Student Learning
   b. Increased Enrollment

2. Explanation of initiative:
   Created two designated positions; webmaster and web programmer, and contracted with an outside consultant to provide a customized content management system. The aim was to distribute access to the University website more widely for internal departments, so the website would better reflect the University’s dynamic community. We expect to see better communication through the website to all University constituencies and increased enrollment.

   The Magic Hour content management system (CMS) project is two separate
projects:

- Development of a web application that enables students and faculty to access information in the Registrar Database.
- Implementation of Magic Hour enables faculty and staff to create and update information about their departments

(1) Web application

The first project includes the following 5 items:

- Student can see what classes they are enrolled in for current or future semesters, and link to a web page authored by faculty to see various reference materials for each class.
- Students can see a complete list of all their courses taken at MUM, including grades (not GPA).
- Student Directory (searchable) and Faculty Directory (searchable) shows mostly contact information. Students can opt out of this directory and control what contact information they wish to show.
- Students and faculty can maintain and update their own contact information on-line.
- Faculty can see what classes they are scheduled to teach for the current or future semesters.

Each class has a link to the class roster, and another link to enter grades for the class.

Thus the Magic Hour system is not simply a CMS environment. It also provides a set of tools our internal developers can use to provide web front-end display environments to publically display data that is currently only visible in backend data interfaces. That means we will rely less on outside vendors to display legacy data in a useful way.

PERSONNEL SAVINGS

The Enrollment Center estimates savings of one full-time person when these are implemented due to:

- students not needing to come to the office in Dreier to ask questions
- the office not required to maintain so much personal data on each student
- faculty able to enter grades more efficiently
About 13 other items are part of future implementations that will enable additional benefits of more efficient or reduced staff (at least one more staff member). Many of these items are will improve service (including advising) to students which should support increased student satisfaction and retention.

(2) Content management system

It’s more difficult to quantify the benefits of this aspect of the project. MUM Director of Marketing feels that distributing information in the Catalog and Student Handbook throughout the mum.edu website into small pieces where it is most relevant, and updating whenever necessary, will be of great value to the students. He describes it as increasing the self-referral intelligence of the university.

It will enhance retention and recruiting — students expect this kind of access to information, especially transfer students, who are used to this at their previous schools.

The Magic Hour content management system plays all kinds of roles in addition to the items described above, which are largely expressed in terms of intranet functions: access to internal information by students, faculty and staff.

Most grandly it enables us to enhance the visibility, dynamism and “stickiness” of the site (user time spent onsite) plus streamlining a number of key marketing activities, including:

- Having multiple authors add content to the site typically means that a lot more content gets created — event descriptions, portfolios, articles, blog posts, photos, departmental activities, etc. More content creates more web traffic, which results in more search engine prominence for the site.

- A CMS system enhances the marketing department’s ability to quickly deploy ad landing pages and search engine optimized pages — two key industry practices that drive site traffic and enrollment.

- Events, lecture announcements, and calendars drive both initial interest and reengagement, creating many reasons to come to the site again and again.

- An individual portal system (part of the Magic Hour deliverable) allows current and incoming students to feel they are part of something even before they enroll, since they have their own page onsite.

- A CMS system also takes the pressure off of a single webmaster or web team do everything and create everything for all internal parties. No more bottlenecks due to overworked personnel.
From a marketing perspective, a CMS enabled site allows a full chorus of information to greet the user, rather than a single note.

3. Who is responsible:
   a. EC Member – Dean of Admissions
   b. Director of Marketing
4. Metrics to measure success:
   a. Increased enrollment as projected in financial model
5. Resources needed to implement:
   a. Included in recruiting budget in financial model
6. Timeline:
   a. Year one – basic launch complete
   b. Further functionality developed in each subsequent year

**Lean Management Initiative**

1. Goals this initiative contributes to:
   a. Financial Stability – reducing fixed costs as a percentage of total expenditures as enrollment grows
2. Explanation of initiative:
   This was launched as a systematic approach to continuous improvement — as a way to improve customer service across the University, improve employee morale, and build capacity so that we can increase enrollment while keeping expense increases to a minimum.
   In the fall of 2011, we hired a consultant from Winona State University, who took 22 university leaders and faculty and staff through a 4-day training session to become “lean facilitators.” Beyond the cost of the consultant, no extra expense was involved apart from the time invested in the various lean initiatives we undertook. We undertook an ambitious number of initiatives, including academic advising, residential life, academic governance and decision-making, personnel hiring, purchase order procedures, and others. Over time, every process in the University will undergo a lean process, and we will bring the lean lens back to each area every several years. We will likely train another group of lean facilitators at some point in the future.
3. Who is responsible:
   a. EC Member – Executive Vice President and Chief Administrative Officer
4. Metrics to measure success:
   a. Administrative expenses track with financial model as enrollment grows
5. Resources needed to implement:
   a. Existing personnel
6. Timeline:
   a. Initial launch in year one
   b. Continuous application in all subsequent years
Training of new faculty to deliver consciousness-based education

1. Goals this initiative contributes to:
   a. Improve Student Learning and Increase Enrollment

2. Explanation of initiative:
   The purpose of this initiative is to maintain and strengthen our current high level of Consciousness-based Education even as we add new faculty to accommodate increased enrollment. The components of this initiative include:
   a. Enhancing the recruiting, hiring, and initial orientation of new faculty. This process began in early 2012 with a LEAN process analysis and development of standard procedures. Most steps of the new procedures have been implemented, beginning in summer 2012.
   b. A new Faculty Training Program has begun under the leadership of the Dean of Teaching and Learning, Jane Schmidt-Wilk. Two Faculty Development Workshops on Consciousness-Based Education were held, in May 2012 and October 2012, led by world-renowned expert in Consciousness-Based Education, Dr. Susie Dillbeck.
   c. Development of criteria for certification in Consciousness-Based Education

3. Who is responsible:
   a. EC Member – Dean of Faculty, Dean of Teaching and Learning, Academic Planning Council, and the Faculty Personnel Committee

4. Metrics to measure success:
   a. Class observation reports
   b. Number of faculty reaching certification
   c. NSSE and SSI reports on academic quality items
   d. Retention and time-to-graduation data

5. Resources needed to implement:
   a. Released faculty time for training
   b. Full-time Dean of Teaching and Learning (already in place)

6. Timeline:
   a. 2012-2013: Observe all classes
   b. Spring Semester, 2013: Offer Faculty Training Course to recently-hired faculty
   c. By 2014: Approve criteria for certification in Consciousness-Based Education
   d. Continuing from 2014: train and certify all faculty; train and certify new faculty
INITIATIVES CONTINGENT ON FUNDING

Strategic Initiative Priorities for Extra Funding—Dean of Faculty
The following are initiatives that could be started in the next one to five years if funding were available. They are listed in order of priority if extra funding is available.

1. Technology audit and upgrade of all campus IT software systems. Most are based on very old and obsolete systems and are not integrated with each other.
   a. This is essential to handle additional students. The system we have now is not sufficient even for the students we have and we must be prepared for growth.
   b. Two full time positions plus up to $100,000 for software costs.
   c. Our Student Information System (Rama) is very old and not up to any current standards of function or usage.
   d. This should include student finance, student information, student portal for DE, advising, grades, etc.
   e. The first step is to do an audit and build an architecture and plan for the campus software.

2. Funding for faculty to attend conferences—conferences in their discipline and conferences on teaching and learning—so that there are more opportunities for scholarly exchange and research between faculty and colleagues at other institutions and more visibility for MUM in the academic community

3. MA in Media and Communication
   b. This degree has been approved and is ready to start in August 2013.
   c. Needs include equipment, space, and up to one new full-time faculty member.

2. MS in Sustainable Living
   a. This has been proposed for January 2014.
   b. The department must write a proposal and estimate costs, including faculty, equipment, and space.

3. A new Computer Science building, the current building is full to capacity and we plan to double in the next 5 years.
   a. At least one room that holds around 150 for larger classes when needed, and some other smaller rooms with capacity for 40.

6. MFA in Media and Communications
   a. This is the next step that the department would like to take after the MA.
   b. This program will provide future faculty.

7. MA in Education (Summers plus DE). CBE is the core of MUM, but our MA in Education has so few students. We must remedy this. We can offer our existing MA in Education (also) as a two-year program that includes three-summers (20 credits = 8 + 6 + 6) and four semesters of DE at 5 credits each (max 40 credits total). We should tailor it for US private school teachers who want to upgrade their BA to an MA. They can get federal loans, and they do not have to give up their jobs. This will build on the excellent reputation of MSAE and give us a pool of students/alumni who will recommend MUM to their private-school pupils, who have the ability to pay full tuition at MUM. That makes it strategically very important for MUM.
   a. Resources needed: $10,000 for initial marketing campaign, and $40,000 for 1 FTE
Education faculty member with doctorate to teach 20 credits per year.

8. RN-to-BS/BSN in Physiology & Health. Target our BS in Physiology & Health to people who have associate degrees and Registered Nurse (RN) professional qualification. The trend in the health care field is for RN’s to need a bachelor’s degree. If we can add a few courses to our BS program so that students would get a BSN (Bachelor of Science in Nursing) that might be even better. It is strategically important for MUM to train licensed health care professionals, and bringing in already-licensed RNs to educate them in consciousness-based health promotion should be an easy way to influence the profession.
   a. Resources needed: $10,000 for initial marketing. $40,000 for 1 FTE MSN-qualified faculty member who can teach 5 additional courses for the BSN degree. There is a lady on the MA-MVS now who has an MSN degree and collegiate teaching experience in nursing. She wants to join MUM faculty and do this.

9. MFA in Art
   a. The Art Department used to offer an MFA and would like to begin one again.
   b. The department must write a proposal and estimate costs, including faculty, equipment, and space.
   c. This program will provide future faculty.

10. PhD in Computer Science
    a. This is a costly investment, but it will provide prestige for the University and faculty for on-campus and DE programs in the long run. A doctoral program will enhance the quality of the MS and BS programs.
    b. Funding needed:
       i. New faculty with doctoral degrees
       ii. Research funding for PhD faculty
       iii. Graduate fellowships and instructorships for PhD students
       iv. Additional office space for faculty and doctoral students

Computer Science Department Building Investments – Dean of Computer Science

I’d like to also suggest support for the new Computer Science building(!), as we are already completely full in our current building, and if we have plans to grow by another up to 100% in the next 5 years, and more after that, we need to plan for adequate *vastu* space for our faculty and classes.

Currently we already have scheduling constraints with classroom space, both lacking bigger classrooms, and to stay in Vastu. I of course emphasize Vastu, as I think it is a main pillar of our success, and moving our classes to any other venues because of not having enough space will undermine that success.

In this planning let’s make sure to have at least one Dalby like room that takes ~150 for our larger classes when needed, and some other smaller ones that can easily go up to 40.

Of course the financing, planning, and building of such new facilities takes several years, so rather than just a wishful future, this is a fundamental enabling factor for having these high enrollment numbers and expansion in our strategic plans.
While such plans may seem grandiose, in reality CS has generated revenues above our planned budget of almost $1M each of the past two years, so perhaps we could start allocating some of that for this now? At least dig a hole and plant some gems?!
SECTION 3:

STATEMENT OF LONG-TERM GOALS:

IDEAL VISION
The following Statement of Long-Term Goals serves as a bridge between the University’s Founding Goals and the University’s current Strategic Plan (which covers 3-5 years). Its intended audience is those who are involved in charting the University’s success, rather than the general public. The University aspires to achieve these goals, which are both specific and broadly inspirational, in the next 20-30 years.

Our Vision

The entire world is transformed to Heaven on Earth as described by the Founding Goals of the Maharishi University of Management.

The University is a global institution in scope and responsibility. It is the flagship institution in the network through which Consciousness-Based education is adopted in every school, college and university in the world.

We create branches of the University and Maharishi School of the Age of Enlightenment, and extend Consciousness-Based education to all students attending other schools and universities through collaborative relationships.

Enlightenment and Invincibility

The central Fairfield campus has 10,000 students practicing the Transcendental Meditation and TM-Sidhi programs, including Yogic Flying, as an integral part of their education. Through the global outreach of the University, every nation has sufficient Yogic flyers to achieve national invincibility in all 192 countries.

In addition to practice, we provide the theoretical knowledge of the development of consciousness through teaching Maharishi’s Vedic Science and Technology, so that every student is fully prepared for their own growth of experience of higher states of consciousness.

We provide ample scholarships for students from around the world to study at MUM Fairfield to gain the benefits of a Consciousness-Based education.

Academic Programs

We expand our faculty and programs to include 12 core fields of knowledge:

- Law (natural law)
- Economics
- Communication
- Education
- Administration
- Music and Arts
- Health
- Architecture and Engineering
- Religion and Culture
- Agriculture
- Defence
- Supreme Political Science

We structure the sequence of undergraduate learning so that in their first year, students gain knowledge of all 12 disciplines, before having the opportunity to specialize in a particular field.
Our curriculum in every discipline connects the knowledge of the discipline to the basis of life, the Unified Field, total Natural Law, the experience of the Self.

We offer a wide diversity of disciplines, and professional training in those disciplines. We provide students the basis for both enlightened lives and successful and rewarding careers in the fields of their choice.

We ensure that all of our faculty are completely up-to-date with the latest knowledge in their fields.

We continually review every course and program, making improvements to ensure that all are at the very highest level of academic excellence.

Teaching and Learning

We ensure that all teaching is at the very highest level, and that the most effective teaching methodologies are employed consistently. These include both the systems of teaching conveyed by our Founder, Maharishi, and the most valuable and appropriate methods found in professional educational practice.

We use the very best of educational tools and technology (e.g. online education) to expand the reach of our courses and programs into every home throughout the world.

Service and Research

We train PhDs—enlightened professors and administrators—to lead other schools and universities around the world in adopting Consciousness-Based education.

We form strategic alliances with organizations around the world to rapidly expand the reach of our programs.

Our faculty establish research institutes connected with each of the 12 core disciplines of knowledge. These institutes serve to connect each discipline to its basis in pure consciousness, to expand the knowledge of each discipline, and to promote and implement opportunities for the practical application of knowledge—thus bringing perfection to every profession in society.

Faculty publish, at the very top of their fields, become renowned, world famous.

Every year we host international seminars and symposia in every field, bringing the very best minds in the world to bear on clear parallels between Maharishi’s Vedic Science and Modern Science.

Faculty Training and Support

All faculty are dedicated to their role to preserve and protect the whole system of Consciousness-Based education, passing that knowledge in absolute purity from generation to generation. The University administration and Board of Trustees are similarly dedicated to uphold that purity. The structure and every component of Consciousness-Based education—the
techniques, the knowledge, Maharishi’s teaching on every subject, the systems and methodologies of teaching—everything is packaged and preserved.

Immediately, the faculty create comprehensive packages and systems of training, including periodic assessments and refreshers, to pass on the system of Consciousness-Based Education to new faculty everywhere. The faculty create these training materials and methods with the understanding and intention that they will be used for thousands of years.

We ensure that all faculty have the support they need, both professionally and personally, to fulfill their roles through these channels—teaching, curriculum, service and research—so that the University is fully capable to deliver perfection in education.

Maharishi School of the Age of Enlightenment

All of our goals in the field of higher education—global and local—are mirrored by corresponding goals in the fields of primary and secondary education, fulfilled by the faculty, administration and students of Maharishi School of the Age of Enlightenment.

Our Campus

Our central campus in Fairfield provides an ideal environment for living, learning, and teaching. The life of faculty, administrators and students is comfortable, abundant, peaceful and delightful for all, with no strain or pressure.

We continue to reconstruct the entire campus according to the highest principles of Maharishi Vastu, so that everyone lives and works in perfect vastu.

The campus is crowned by a Maharishi Tower of Invincibility, with 12 floors embodying the 12 core fields of knowledge, and with a planetarium at the very top.

The campus is surrounded by Maharishi Vedic Organic farms (including greenhouses and dairies), so that at all times of the year everyone is able to enjoy fresh local Maharishi Vedic Organic produce.

All food that we serve is delicious, vegetarian, organic, and of the very highest quality: Maharishi Vedic Organic, including Maharishi Vedic Organic milk and dairy.

Our Community

The families of everyone in the larger University community grow up in ideal conditions, attending our institutions, living in Maharishi Vastu, being given the total Sat Yuga path to enlightenment. Every child knows the Self and becomes an ideal citizen.

The local community of meditators and Sidhas attend group programs in the Golden Domes of Pure Knowledge and other group flying facilities, contributing to their own enlightenment and national invincibility.
We offer a complete range of continuing education courses both in the local community and through distance education, ensuring that the development of consciousness, learning, and the application of knowledge are lifelong practices.

Thousands of people retire into our community, living comfortably while participating in advanced programs of experience and knowledge for the rapid growth of consciousness.

The University hosts thousands of participants in the Invincible America Assembly who enjoy Brahmichetana, supreme experience—thrilling the environment, serving as a center of national coherence, and nourishing our whole world family: “The World is My Family”—“Vasudhaiva Kutumbakam.”

Within our University community there always is a vast group—thousands—of Vedic scholars from India creating peace for the nation and the world.

We create a massive city of enlightenment, such that angels in heaven would envy those who could live in or even visit such a city.

Finance and Planning

The University builds an endowment to support all of its activities, at least $1 billion (which probably is too little), so that every one of these goals is fulfilled, and everyone connected with the University is looked after from the moment of being born until they have lived 100 years.

All stakeholders of the University participate in the expanded strategic planning to achieve these goals, so that the entire physiology of the University is intimately and integrally involved in our highest vision for our University and our world – and the means to achieve it.

Global Vision

Around the world, every branch campus and every institution affiliated with the University progresses rapidly to formulate and achieve corresponding goals for their own institutions, communities and nations.
